Please note that this size chart has been provided to our customers as a courtesy and it is only to be used as a general guideline, not a guarantee of size.

Youth size is for average sized children between the ages of 8-10. The chart shows how small and how large the waist can be adjusted.

Adult sizes from XXS to XXXL show how large the waist size can be adjusted. Each size can be adjusted between 3-4" smaller.

If you are buying a jersey and a pant set, it is best to order a jersey that is one size larger than the pant you are ordering.
